

# HAND-E-FORM

## PRE-POUR RECOMMENDATIONS

### **Prior to every pour, inspection is a requirement that must not be compromised.**

It takes a qualified knowledgeable technician to inspect a setup in every detail before each pour. This work includes both sides of the setup. Every spreader tie, pin and every plate clamp must be checked. It means inspecting for all tied and untied joints.

### **For the safety of the crew and the success of the project, be sure to inspect:**

- Spreader Ties
- Spreader Tie Pins
- Plate Clamps
- Tied and Untied Joints
- EFCO Form Release Agent
- Aligners
- Aligner Clamps
- Align Top of Wall
- Vertical & Horizontal Alignment
- Bulkheads Secure
- Scaffolds, Toe Boards & Guardrails properly installed
